World Future Society
July 22-24, 2016

Deborah Peacock is honored to serve on the Board of the World Future Society (WFS). WFS is celebrating its 50th anniversary at the World Future 2016 annual conference in Washington, D.C. July 22-24, 2016. WFS' mission is to harness the spirit of discovery, the power of imagination, and the energy of collective action to create a brighter future.

YOU ARE ALL FUTURISTS! Anyone who works with patents and technology works in the future and interfaces with future trends. We encourage you to become a member of WFS – the membership fee is quite reasonable and you can keep up with the technology and social trends in your particular area. We also encourage you to attend the annual conference.

The upcoming WFS convention will feature Keynote Speakers Kimbal Musk and Bob Richards. Kimbal Musk is an entrepreneur and is on the boards of Chipotle Mexican Grill, Tesla Motors and SpaceX. Bob Richards is a space entrepreneur and futurist and is a Co-founder and CEO of Moon Express, one of our clients. Bob co-founded the International Space University, Singularity University, SEDS and Google Lunar X PRIZE competitors Odyssey Moon Ltd. and Moon Express, Inc. Moon Express plans to land on the Moon in 2017 and we are patenting its lunar lander.

In addition to the Keynote Speakers, Kimbal Musk and Bob Richards, there will be other amazing speakers and workshops at the WFS conference. To learn more about the World Future Society event and membership, please visit the WFS website www.wfs.org.

Deborah will be attending the conference and hopes to see you there!
