FatPipe ABQ
Collaborative Workspace for
Start-ups and Entrepreneurs

Much of Peacock Myers, P.C.'s business is founded on the enthusiasm and ideas of entrepreneurs. We realize that being a start-up has many challenges and we want to let our clients know about a great organization - FatPipe ABQ.

FatPipe ABQ was founded on the principal that startups thrive in supportive environments. Collaboration, inspiration and the sharing of ideas can happen on a trip to the copy machine or across the hall — not just a business trip across the country (or the world). FatPipe ABQ has created that kind of environment. From individual workstations to private offices, FatPipe is a terrific co-working space. FatPipe provides a space to grow while seamlessly coexisting alongside fellow likeminded individuals or teams. FatPipe ABQ has state-of-the-art facilities and is strategically located in the heart of Albuquerque's Innovation District at 200 Broadway Blvd. NE, Albuquerque, NM 87102. Through learning opportunities between community members, start-ups find themselves naturally collaborating through the sharing of ideas and challenges. Start-ups develop with helpful input from the entrepreneurial community and achieve success by taking advantage of the on-site training as well as seminars from the FatPipe ABQ platform. For more information about FatPipe ABQ please contact Lisa Adkins at lisa@fatpipeabq.com.
