**Creative Destruction Lab – CDL
Calling All Founders with Massive Ideas:
Applications for CDL 2021/22 Program Year Are Now Open!**

Deborah Peacock is a mentor with Creative Destruction Lab (“CDL”). CDL is an amazing nonprofit organization that runs a nine-month, objectives-based accelerator program in 15 technology “streams” at nine sites across the globe for massively scalable, seed-stage, science- and technology-based companies. CDL works with startups that employ innovations in technology that promise a chance of delivering significant improvements to economic productivity and human welfare. It does not charge any fees or take equity.

Applications are being accepted from motivated venture founders in the process of building the world’s most promising science and technology startups who could benefit from mentorship, technical advice, and the opportunity to raise capital. Is this you?

More than 4,000 founders from over 1,700 companies have already participated in CDL since 2012, and \$8 billion (CAD) in equity value has been created. Check out Alumni of the CDL Program at: <https://www.creativedestructionlab.com/companies/>.

CDL has identified five key elements that help venture founders transform their projects into scalable, financeable companies: 1) Objective-setting; 2) Focused mentorship from experienced entrepreneurs who have founded, led, and sold significant tech companies; 3) Technical advice from world-leading scientists, engineers, and economists; 4) Hands-on support from top business students; and 5) Opportunities to raise capital, including from angel investors and venture capitalists in North America and Europe.

Applications are due July 30, 2021 for the next program which will begin in October 2021. Due to the global COVID-19 crisis, the program has been currently adapted to be delivered entirely online, although this may change over time. If you would like to take advantage of this opportunity, please apply at: <https://www.creativedestructionlab.com/apply-now-2021/>

Applications are being accepted for these technology streams: Prime Streams (General Technology) and Specialized Streams (Ag, Artificial Intelligence, Blockchain, Climate, Commerce, Energy, FinTech, Health, Matter, Neuro, Oceans, Quantum, Risk, Space, and Supply Chain),

If you have questions or require assistance, feel free to contact CDL at support@creativedestructionlab.com. Please email Deborah Peacock if you do apply.
